Other activities	32	5% ^a	39	6%	62	10% ^a	41	6% ^c	94	7%	80	6%
None	18	3% ^a	289	42% ^b	48	7% ^a	207	32% ^b	66	5% ^c	496	37% ^c

a Continuing families' values at intake are significantly different (p<.05) than new families' values at intake (based on Pearson chi-square statistic).

b Continuing families' values at outcome are significantly different (p<.05) than new families' values at outcome (based on Pearson chi-square statistic).

c Intake values are significantly different (p<.05) than outcome values within the category (based on paired t-test).

d Participants were not asked this question until the 1999-2000 program year.
